

MVP Prototype Document: UniConnect

1. Prototype Notes & Constraints

Main Flow: This prototype demonstrates the "Happy Path" of a student user: from authentication and navigating the class environment to participating in a delegate election.

Assumptions & Constraints:

- **Desktop Only:** The MVP is designed for a 1920x1080 resolution.
- **Static Data:** For the prototype, data (student names, timetable slots) is pre-loaded; the final system will use SQLite.
- **Multi-Page Application (MPA):** Each screen is a distinct HTML file linked by standard navigation.
- **Role Management:** The "Admin Panel" is restricted to users with the "Professor" or "Administrator" role.

2. MVP Screen List & Feature Mapping

We have selected **7 essential screens** to support our MVP features:

Screen Name	Associated MVP Features
1. Auth (Login/Register)	User authentication and role-based access.
2. Admin Panel	Creation/management of groups, student moderation.
3. Resources	File sharing and academic resource management.
4. Chat	Group messaging.
5. Announcements	Special messages posted by professor or delegates.
6. Timetables	Timetable access & study event overlay.
7. Election View	Integrated voting mechanism & multimedia feedback.

3. Wireframes (Visual Descriptions)

Screen 1: Auth (Login/Register)

- **Navigation:** Links at the bottom to toggle between "Sign In" and "Create Account".
- **Main Content:** A central Material Design card with outlined input fields.
- **Main Actions:** "Sign In" / "Create Account" buttons (Pill-shaped).

Screen 2: Admin Panel (Teacher)

- **Navigation:** Left Discord-style sidebar with "Search Group" and "Create Group".
- **Main Content:** Dashboard with an announcement text area and a student management table.
- **Main Actions:** "Post", "Upload Timetable", "Start Election", "Kick Student".

Screen 3: Ressources

- **Navigation:** Left sidebar with icons for all class apps.
- **Main Content:** Vertical scrollable area with categories for the different types of ressources.
- **Main Actions:** Downloading and uploading of ressources.

Screen 4: Chat

- **Navigation:** Left sidebar with icons for all class apps.
- **Main Content:** Vertical scrollable message area with user avatars.
- **Main Actions:** Message input field at the bottom with a circular "Send" button.

Screen 5: Announcements

- **Navigation:** Left sidebar with icons for all class apps.
- **Main Content:** Vertical scrollable message area.
- **Main Actions:** For admin, prof and delegates posting a message. For the others, read the messages.

Screen 6: Timetables

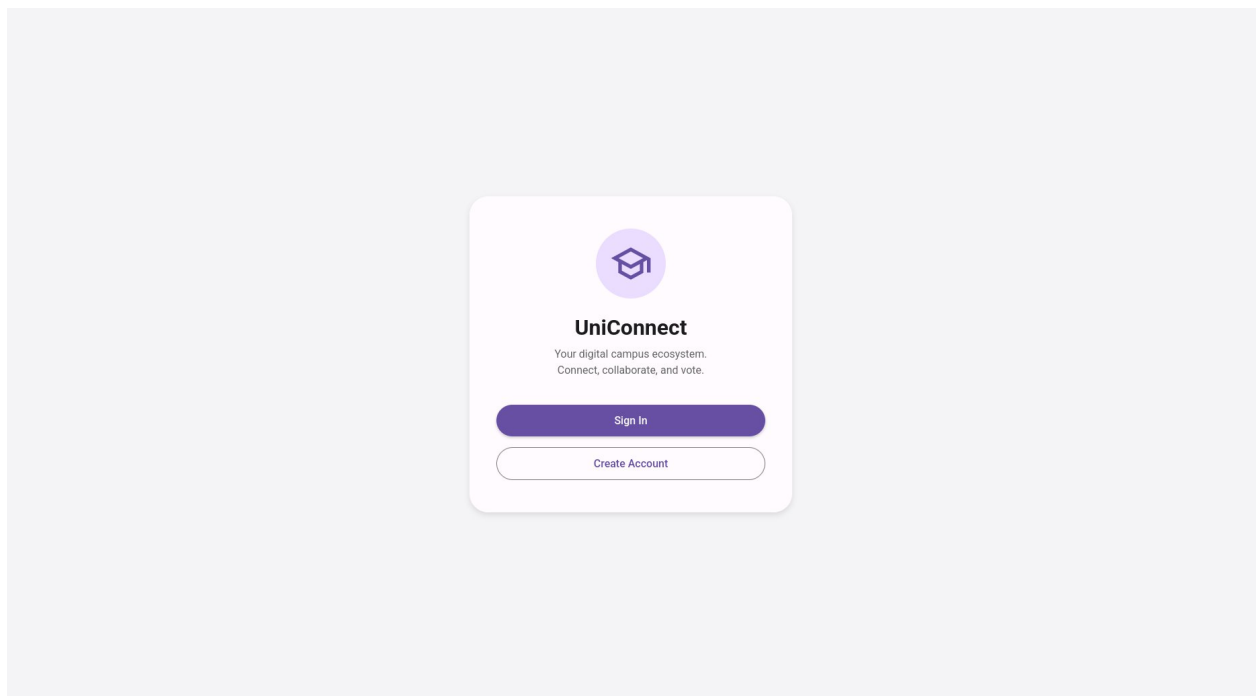

- **Navigation:** Left sidebar.
- **Main Content:** A 5-column grid (Mon-Fri) with hourly rows.
- **Main Actions:** Interactive cards representing courses (Purple) and study sessions (Green).
- **Note:** This screen hosts the entry point to "Event Creation".

Screen 7: Election View

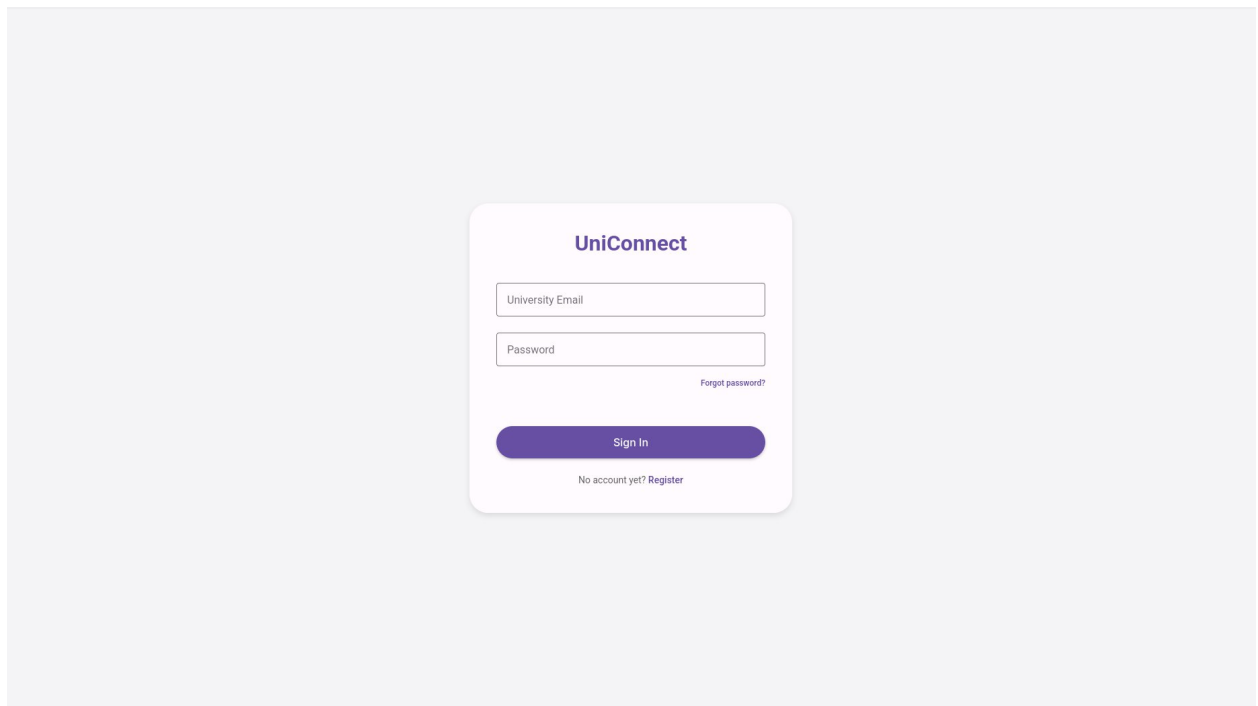

- **Navigation:** Left sidebar.
- **Main Content:** A list of candidate cards with "Manifestos".
- **Main Actions:** Radio button selection on cards and a large "Confirm Vote" button.
- **Multimedia Element:** **[SUCCESS ANIMATION BOX]** - A hidden overlay that triggers a confetti animation and a green checkmark upon clicking "Confirm".

4. Main User Flow (Happy Path)

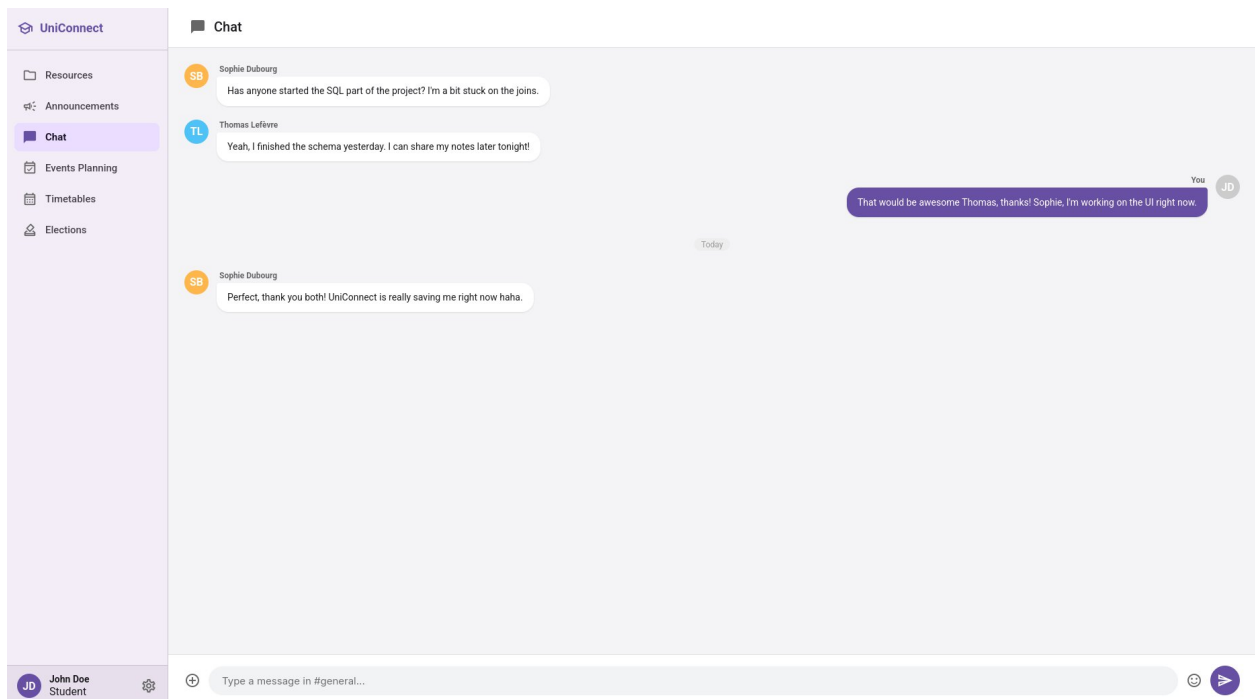

Scenario: A student logs in, checks the class updates, and votes for a delegate.

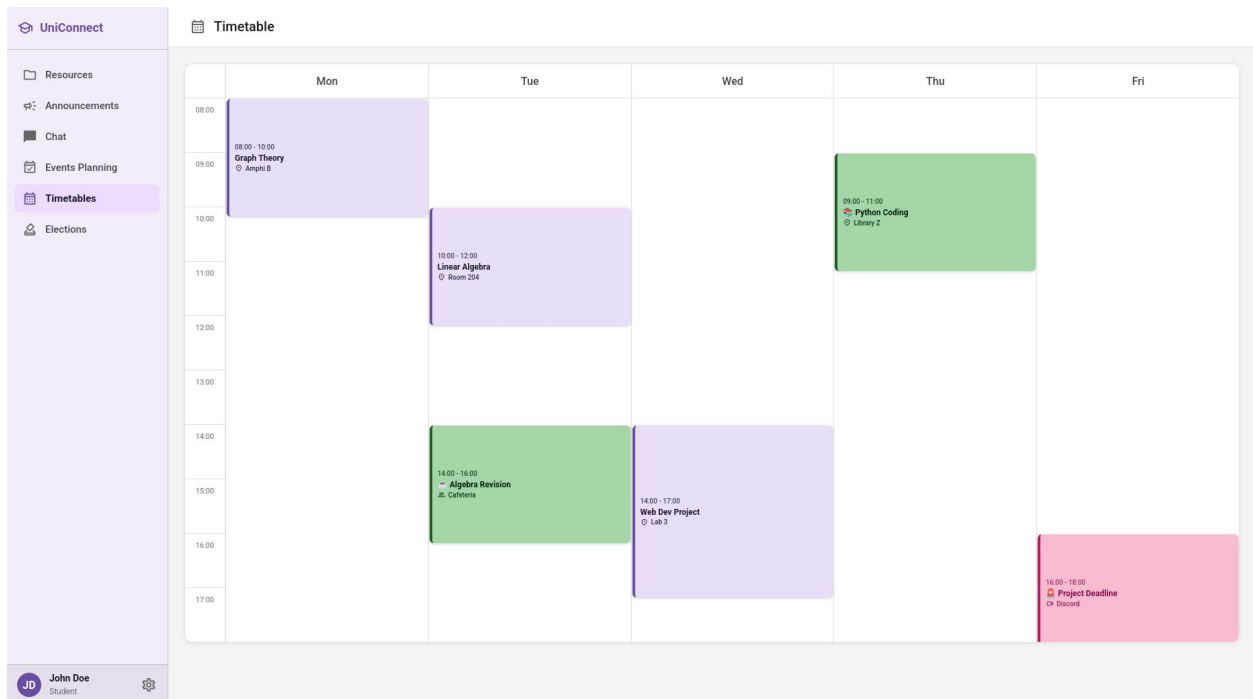

1. **Open Index:** User lands on the welcome screen and clicks "Sign In".
2. **Login:** User enters credentials on the Login page and submits.

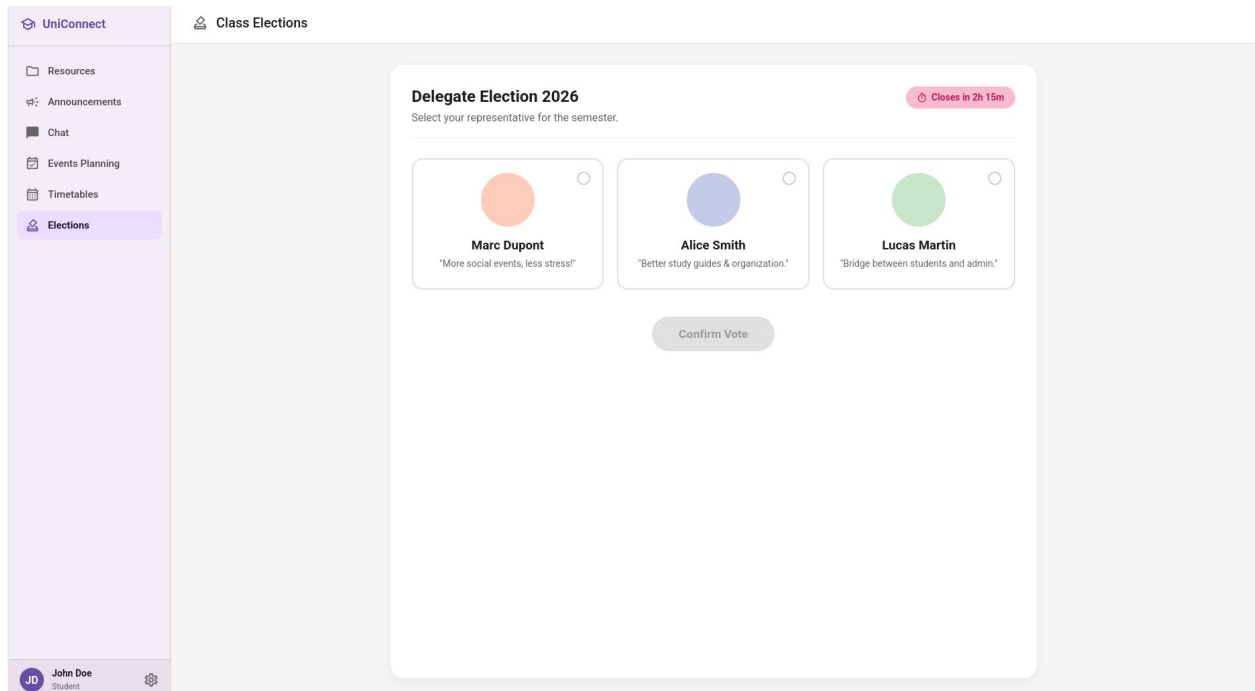

3. **Dashboard/Chat:** User is redirected to the Class Chat and reads the latest messages.

4. **Navigate:** User clicks "Timetables" in the sidebar to check the week's revision sessions.

5. **Go to Vote:** User clicks "Elections" in the sidebar.

6. **Events planning:** User clicks on the event planning button on the sidebar

Midterm Exam Postponed

Please note that the Software Engineering midterm scheduled for this Wednesday has been moved to next Monday, March 9th, in Amph B. The extra time is to ensure everyone can complete the lab requirements.

Pizza Night! 🍕

To celebrate the end of the first project phase, we're organizing a pizza night at the campus cafeteria this Friday at 7 PM. Please vote in the "Events Planning" tab so we know how many to order!

New Resources Uploaded

I have uploaded the slides for Chapter 4 (UML Diagrams) and the practice exercises in the Resources folder. Make sure to review them before the lab session.

8. **Ressources:** User clicks on the announcement button in the sidebar

5. Consistency Check

Statement of Scope: Every element presented in these wireframes (Messaging, Timetables, Admin Tools, Elections) is strictly within the defined scope of the MVP. Out-of-scope features like "Video Calls" or "Grade Calculators" are not included. The **Multimedia Element (Success Animation)** is fully integrated into the Election screen and the final step of the main user flow.
